Latest Information Regarding Windows® 10 May 2019 Update

Updating Windows 10 will change operating procedures, display of screens, etc.
The main functions for which the operating procedures have changed from those described in the operating instructions and the functions for which caution is required during operation are as follows.

● Main functions for which the operating procedures are changed by the update

No.	Applicable function	Operating procedure after update
1	Network icon on the task tray	When the network does not connect to internet, is displayed on the task tray.
2	Setting the Windows Password	1. Click (Start) - (Settings) - [Accounts] - [Sign-in options]. Alternatively, click (Settings) - [Accounts] - [Sign-in options] in the tablet mode. 2. Click [Password] - [Add].
3	Screen brightness	You can NOT separately set the brightness for when the AC adaptor is connected and when not connected.
